

# eurosens Dominator CAN

## Advantages

- Strong electric circuit protection (up to 170 Volt).
- Modular design and bayonet mount with fast sealing.
- Easy maintenance.
- CAN-bus interface (SAE J1939) and K-line.
- Automotive-type reliable connector in sensor body.
- Automatic fuel theft identification with alarm output.
- **Compatible with CAN-bus GPS trackers.**
- **Low cost of maintenance during lifecycle.**

## Application

- Remote fuel consumption monitoring
- Local fuel monitoring
- Gauge sensor for special machinery
- Fuel theft alarm sensor

## Specification

Supply voltage, V	10 – 60
Reverse polarity protection	yes
Measurement accuracy	±1%
Temperature range, °C	-40 - +85
Output interfaces	CAN J1939
Configuration interface	<b>ISO 9141</b>
Seal rating	IP 67

**5 years warranty**
