Drop in Replacement The Mass Flow Advantage.

Rotameters also known as “Sight Glass” Variable Area (VA) meters, are used across nearly every industry where economical gas flow metering and flow regulation is required.

Rotameters are volumetric flow meters and only capture the gas flow volume, not gas mass flow rate. All volumetric flow meters and regulators are sensitive to gas pressure and temperature changes—a pressure change of just 1 Bar generates flow rate error of up to 50%.

We designed our Redy-Compact to be the ultimate alternative. A true thermal mass flow meter, RedyCompact is for those that want the highest accuracy and repeatability and need a drop-in replacement for a Rotameter.

Battery powered, with a large touch-screen, Redy-Compact is easy to read from a distance. Regulate flow rate with the high-resolution valve by dialing in your manual setpoint. Two standard AA batteries give the meter months of operation. An optional Micro-USB power plug is also available.

Superior Physics for Lifetime No-Drift Warranty

RedyCompact comes with our Lifetime No-Drift Sensor Warranty made possible from high-precision MEMS (Micro-ElectroMechanical Systems) technology

utilizing an advanced, ultra-stable no-drift CMOS (Complementary Metal Oxide Semiconductor) sensor.

The use of MEMS techniques allows both electronic circuits and mechanical devices to be manufactured on a silicon chip, similar to the process used for integrated circuits.

Typical low accuracy sight glass rotameter replaced by RedyCompact.

Making the Ultimate Thermal Mass Flow Meter

At the macro level, RedyCompact can be conceptualized in five core technologies, each of which contributes to unparalleled accuracy, adaptability and reliability.

Gas Mass Flow Sensor Accurate and Reliable MEMS Technology

Our Lifetime No-Drift Sensor Warranty is backed by high-precision MEMS technology utilizing an advanced CMOS sensor for stable gas mass flow rate measurement.

Large Touch-Screen Easy Viewing of Data

Intuitive navigation at the touch and swipe of a finger, the large screen is visible from across the room. A big improvement over hard to read sight-glass rotameters.

Battery Operated Off the Grid

Operate for months on a single double AA battery.

Flow Control Precision Needle Valve

Get precise mass flow control with the needle valve dial located on the front of the instrument.

Advanced Calibration NIST-traceable

Each unit is calibrated over its entire flow range to assure accuracy and repeatability over the life of the device. A fully automated system capable of calibrating hundreds of units at once eliminates any human error during the calibration process.

HIGHLIGHTS

Compact Footprint

As the name suggests, RedyCompact has a small footprint that accommodates drop-in replacement for any Rotameter in the market.

Touch-Screen Display

The touch screen display offers intuitive navigation. The many variables that make the unit flexible are easily accessible. Automatic display alignment is possible due to a position sensor.

No-Drift Warranty

Lifetime No-Drift Sensor Warranty. If drift occurs, instrument will be repaired or replaced free of charge.

Flow Units

Choose between a large number of standardized and normalized flow units from Imperial, US customary and SI, all with user adjustable reference conditions.

Alarm Functions

The following triggers are available: Low alarm, high alarm, window alarm and totalizer alarm. The alarms can be configured with different parameters: Normally open,

normally closed, hysteresis, auto/manual/remote reset, delay and alarm duration.

Device Information & Notifications

Display of complete device information including all configuration settings. Alerts and notifications show up on the home screen.

Panel Mount

Two mounting kits are available for convenient mounting into an instrument panel.

Warranty

3-year operating warranty.
